

## Why to install a spray-painting booth?

### **1. LAW**

Under the Factories Act, it is Statutory requirement to install adequate ventilatory equipment at the place of spray painting operation.

### **2. POLLUTION**

The air exhausted from the painting area Should be free of paint. Only a properly designed and an efficient spray painting booth ensures this and exhausts clean air into the atmosphere without polluting it.

### **3. SAFETY**

Over sprayed paint, if allowed to settle down in the painting area, it is fire prone and hazardous. It also stinks and gives a bad look to the whole area.

### **4. QUALITY OF WORK**

If a filtered air set up is added to the spray booth, it removes all the dust and the other particles and supplies clean air to the painting area. This enhances the painting quality as also the productivity.

### **5. OPERATOR COMFORT**

Painting operator receives continuous supply of fresh air. This ensures his proper mindset and indirectly helps in increased efficiency.
